

**Belltech Greeting Cards Designer** helps you create cool looking paper greeting cards in a matter of minutes and print them right-away on your printer. It is a professional quality greeting card designing and printing software. You can add your own photos, clip-arts, drawings and more. It also supplies 100's of simple verses that you can use in your card.

### Basic Features

- **Create Greeting Cards:** Create great looking greeting cards with your own photos, clip-arts, graphics and background images.
- **Use templates and graphics:** Use from the supplied card templates, background and clip-arts to start the layout of your card easily.
- **Verse Tool:** Insert from 100's of simple to understand verses supplied with the application.
- **Choose Type:** Create half-fold or quarter-fold cards.
- **Quick and Easy Design:** Select and draw shapes and text. Resize, tilt, change color, fill with gradient color or do anything with your design elements.
- **Convenient Design tools:** Can draw rectangle/triangle/circle or any freehand lines and shapes.
- **Choose Background:** Use the supplied backgrounds or use your own. Supports any image of type bmp, jpg, gif, tif, png and wmf.
- **Use your own clip-arts, logo and photos:** We supply you with many graphics that you can use, but you can use your own pictures, logos, clip-arts and design the perfect card you want.
- **Supports any standard papers:** Supports all standard greeting card papers from Avery and other suppliers.
- **Cut-Copy-Paste:** Offers cut-copy-paste functionality for all the design elements. You can also copy-paste texts and images from other applications.
- **Undo/Redo:** Supports Undo/Redo.

### Advanced Features

- **Use Color blends:** This is a unique feature of this software. You can have a color blend the way you want. This is not a static background image, but a filled shape whose color-blend and texture you control completely. Possibilities are endless!
- **More Drawing tools:** You can insert shapes like smiles, hearts, call-outs, sun, moon, star, explosion etc.
- **Align/Rotate:** You can align the selected elements to the right, left, top or bottom, or can rotate them to any desired angle.
- **Right clicks and short-cuts:** The application is equipped with right-click menus and short-cuts to commonly performed actions for your convenience.
- **Supports any paper size:** You can choose any paper size including Letter, A4, A5, Executive, Legal or you own paper size for your card.
